Summary

Junior DevOps Engineer with hands-on experience in Kubernetes, CI/CD automation, and GitOps (ArgoCD). Focused on building scalable, reliable, and automated cloud infrastructure using modern DevOps practices.

Education

ESPRIT <i>Cloud Computing Engineering</i>	Tunis September 2022 – July 2025
ISTIC (Higher Institute of Information and Communication Technologies) <i>Bachelor's Degree in Telecommunications</i>	Tunis September 2018 – 2021

Certifications

Certified Kubernetes Security Specialist (CKS)	October 2025
Certified Kubernetes Administrator (CKA)	August 2024
AWS Certified Cloud Practitioner	July 2023

Academic Projects

DevOps Project Sep 2024 – Nov 2024
Developed an automated **CI/CD pipeline** using **Jenkins** for code integration, testing, deployment, and monitoring. Integrated **SonarQube** for code quality, **Mockito** for unit tests, and **JaCoCo** for coverage reporting. Used **Docker** and **Trivy** for containerization and vulnerability scanning. Orchestrated services with **Docker Compose**. Implemented real-time monitoring via **Prometheus** and **Grafana** dashboards.

Scalable Web Application Development and Cloud Hosting Jan 2024 – May 2024
Designed and developed a scalable web application using **Spring Boot** microservices and **Angular**. Architected and deployed resilient cloud infrastructure on **OpenStack**. Optimized for high availability and performance.

Infrastructure as a Service (IaaS/PaaS) on Kubernetes and OpenStack Nov 2023 – May 2024
Collaborated on the design and implementation of an **Infrastructure as a Service** solution. Automated application deployment on **Kubernetes** clusters. Managed virtual resources using **OpenStack**, improving scalability and system reliability.

Experience & Leadership

data guiding Tunis, Tunisia
Data & DevOps Intern (On-site) Nov 2025 – Present

- Designed and implemented robust data pipelines using Snowflake, Amazon S3, and Terraform for data ingestion, transformation, and export processes.
- Managed the integration of Parquet files from Amazon S3 to Snowflake Bronze and Silver layers, along with data export back to Amazon S3.
- Troubleshoot and resolved issues across DevOps infrastructure, including EC2 OS updates, Kubernetes cluster issues, and data pipeline failures.

JOB2NEXT Tunis, Tunisia
Final-Year Project Internship (Hybrid) Feb 2025 – Aug 2025

- Developed a MERN stack application for a referral rewards system, enabling users to recommend others and earn incentives.
- Dockerized the application into a container image and created **Kubernetes** manifest resources to deploy it in a Kubernetes cluster.
- Implemented a **CI/CD** pipeline triggered by pull requests (PRs) to automatically rebuild Docker images and redeploy updates to the cluster.
- Configured **ArgoCD** to detect changes in container image tags and automatically synchronize the Kubernetes cluster with the latest image version.
- Integrated **Prometheus** and **Grafana** for centralized logging and real-time monitoring.

Station SSCA Quebec, Canada (Remote)
Engineering Internship Jun 2024 – Aug 2024

- Developed a GitHub Actions workflow to sign Android .aab files and deploy to **Firebase App Distribution**.
- Migrated CI/CD workflows from **GitLab** to **GitHub**, ensuring compatibility.
- Built a deployment flow for Firebase **Cloud Functions**.
- Automated unit and E2E tests using **JUnit** and **Playwright**.

Skills & Interests

Skills: AWS, GCP, Git, Docker, Terraform, CI/CD, Kubernetes, Ansible, Prometheus, Nginx, Helm, ArgoCD
Interests: Football, ping pong, football analytics, traveling, investing, podcasts
Languages: Arabic (Native), English (Full Professional Proficiency), French (Full Professional Proficiency)
